

POROUS ROLL CODERS

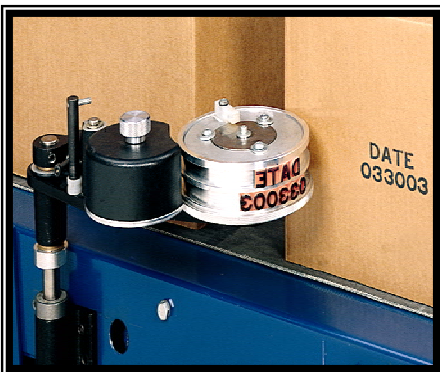

Economical friction-driven roll coder prints documents information, expiration dates and date/batch codes on your carton. Each model mounts vertically or horizontally on your production line to mark the side, top or bottom of carton.

SL/C Coders

Print as low as 1 1/4" from the bottom edge of the carton. Uses Dilok or Flex-Base lettering. The SL/C Coder can be purchased as a kit which includes Dilok rings and rubber friction bearers.

- #1 SL/C 1" x 17" Print Area
- #2 SL/C 2" x 17" Print Area
- #3 SL/C 3" x 17" Print Area

SL/QC Coders

Changes messages quickly with our Quick-Change Roll Coder and extra type holders. Just turn the lever on top to release the type holder and replace it with another prepared type holder.

Print area's same as the SL/C

Mini-Coders

An economical option for lighter-duty applications, the Mini-Coder is ideal for coding small or lightweight items. Maximum print area is 1" x 6" and print as low as 3/4" from the bottom edge of the carton. Uses Dilok type only.

Porous Roll Coders Inks & Types

We offer a variety of inks available to meet your coding needs. Speciality inks and custom ink colors are available. Call for more information.

XLM Cartridges

The premium cartridge— extra long-lasting and re-inkable. Most effective on porous surfaces. Available uninked or pre-inked

DiDark Cartridges

Economical convenient, disposable. For porous surfaces. Available uninked or pre-inked. Recommended for dye type ink only.

Foam Cartridges

Recommended for use with non-porous inks. Available uninked only.

Micro-X Cartridge

Ideal for continuous web applications on porous surfaces. Not re-inkable and only available in mini-coders.

DiLok

Rubber type molded to a tongue-and-groove base which interlocks with the die wheel. Provides excellent message flexibility. Different type sizes can be mixed on the same line. For use with Diagraph RCN, SL series, Mini, SL/NPW, and Handi-Mark coders.

Flex Base

Molded rubber type with a flat base for easier installation and more uniform marking. Long-wearing, extra-deep characters provide sharper marking. Type holders are a necessity with this method of printing.

Hi-Speed

For High speed applications. Hi-Speed type is similar to the Flex Base.
