We have made a conscious effort to produce our products in America whenever possible.

Add a little color to your marker palette

with Diagraph markers

> GP-X[®]
Valve-Action Marker
 Our best seller! This fast-drying, weather- and fade-resistant paint doesn't chip and makes a bold, opaque, permanent mark on almost any surface, including metal, rubber, wood, plastic, PVC and glass. Available in 8 colors. Replaceable felt tips.

> Mark-X[®]
Valve-Action Marker
 This marker's valve-action tip delivers a measured supply of ink for consistent, permanent marks. Perfect for marking on fiber, paper, plastic and labels. Dries quickly. Available in 3 colors. Replaceable felt tips.

> 2018P
Valve-Action Paint Marker
 Heavy-duty pigmented paint will mark on most surfaces. Replaceable bullet tip and airtight cap. Available in 9 colors. Replaceable felt tips.

> Jumbo Insta-Marker[®]
Capillary-Action Marker
 Provides an instant, waterproof, permanent mark on porous and most non-porous surfaces. Features a chisel-point tip for variable-size marking. Available in black.

> Control Flo[™]
Marker Refillable Valve-Action
 Makes a bold mark on most surfaces. The ControlFlo Marker's large ink capacity results in a low cost per mark. Use with Insta-Dry and Stikfast[®] inks listed on page 17. Replaceable felt tips.

> Perma-Line
Capillary-Action Marker
 A fine line marker that makes a permanent mark. Resists wear to assure a fine point for the life of the marker. Ideal for non-porous surfaces. Dries Quickly Available in black.

> 563 Speedry
Paint Markers
 Valve action with acrylic replacement tip. Easy to hold 9/16" diameter aluminum barrel. Airtight color-coded cap fits on recessed end of the barrel. Opaque, fast drying permanent paint. Available in 13 colors. Replaceable felt tips.

> Ideal Mark
Valve-Action Indelible Marking Pen
 Legendary performance, excellent value. Indelible, fade resistant ink, color coded cap, pocket clip, leak-proof aluminum valve. Available in 4 colors. Replaceable felt tips.

> E-Z CLEAN
Valve-Action Marker
 Just the opposite of all the other markers on this page. This marker ERASES! Turn the page for more information. Replaceable felt tips.

▶▶ VALVE ACTION MARKERS

Since developing the first disposable industrial marker, Diagraph has led the way with markers that perform on hard-to-mark surfaces and hold up under tough conditions.

Markers are pre-packaged in cartons of a single color (except refillable Control-Flo marker and the GP-X Assortment Pack). Colors cannot be mixed within a carton. Prices reflect cost per individual marker.

> GP-X[®] Valve-Action Marker

For hard-to-mark surfaces. GP-X markers produce fast-drying, opaque, permanent marks on metal, wood, corrugated, rubber, plastic, glass, porous, and non-porous surfaces. Available in eight weather- and fade-resistant colors.

> X-F[™] Xylene-Free Marker

Marks on porous and non-porous materials, light and dark color surfaces; paper, plastic, metal, wood, rubber and glass.

SC-5 ELECTRONIC STENCIL MACHINE

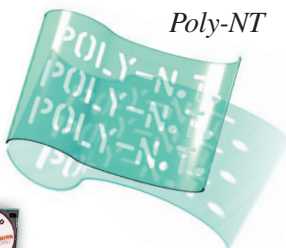

Stencil Machine

SC-5 is the most advanced stencil system available and it is sold at a price that is less than a large character manual stencil machine. Cut characters 1/8" and up. Unique knife saving technology, extra-wide 29" bed, easy to use keypad make this machine appealing. Cuts .010 & .015 stencil board, heavy duty polyester, magnetic vinyl, .008 white polyethylene film (Ultra Cut).

Stencil-Cad Basic 7.1 software offers new "WYSIWYG" (what you see is what you get) screen, and it includes hundreds of fonts, international shipping symbols, Military Government and Cyrillic fonts. Import files from many Windows based programs.

»» **STENCIL MACHINES**

Stenciling is a quick, cost-effective way to mark products for shipment or to identify plant areas. It is also convenient for creating directional signs.

Diagraph stencil machines have been the industry standard since we invented the stencil cutter in 1893. Today we manufacture stencil cutters using leading-edge manufacturing systems and techniques.

Our Stencil Machines are:

- Covered by a one-year warranty on parts.
- Our 1/2", 3/4" and 1" Standard Machines can be specifically retrofitted to cut mylar for an additional \$100 charge.

Stencil machine kits contain stencil machine, 3" Oneshot Assembly, a Black Oneshot Cartridge and 25 sheets of 6.5 x 20 .015 natural stencil board. To avoid shipping damages, ship via truck.

» .015" NATURAL STENCIL BOARD

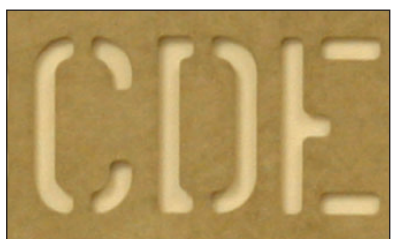

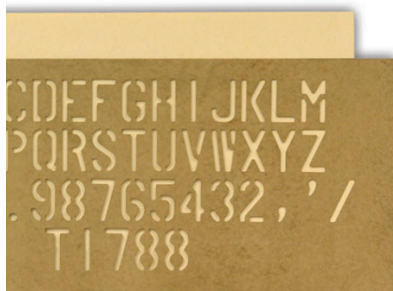

for letters 1/4" and larger
Diagraph Stencil Board is processed with a special formula of double-boiled linseed oil, cured in our own plant and cut with-the-grain for extra rigidity. It lubricates with each cut, extending the life of your stencil machine, and resists ink absorption so the same stencil can be used many times.

Our stencil board is ideal for flat or curved surfaces.

» Canary Yellow Stencil Board

Canary yellow stencil board has been sold for 90 years as the premium quality board, for use with all stencil cutting machines (7/16" and larger) and also for hand cutting large stencils, patterns and other industrial applications.

»»» CUSTOM CUT STENCILS

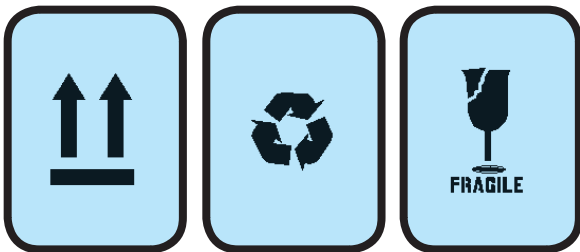

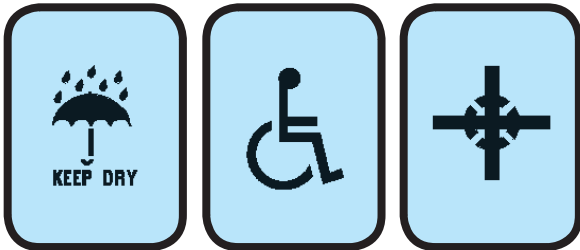

Your logo or other graphic image can be cut in reusable mylar film or oilboard. Allow 1-2 weeks for delivery. Call for more information.

> Custom Mylar Stencils

Our polyester film is super tough and impervious to inks and most acids or chemicals.

> Custom Oilboard Stencils

Custom Oilboard stencils are cut from Diagraph stencil board. 100% recycled fibers. Disposable; biodegradable.

Custom 55-gallon (208.18 L) drum-head stencils are available only in mylar.

 Items bearing this symbol require extended lead times

Universal symbols can be cut in mylar or oilboard to almost any size you need.

»»» PACKING LIST ENVELOPES

Diagraph's Oneshot Kit offers great stenciling value! The kit comes with everything you need to get started including:

- 3" (76.2 mm) roller assembly
- Eight GS black ink cartridges
- Roller cover

Oneshot Roller Assembly

Oneshot Kit with Black GS Series Ink

Oneshot Brush Assembly

Oneshot Ink Cartridges

»»» ONESHOT® STENCIL APPLICATORS

Our patented Diagraph Oneshot stencil system offers you a flexible, portable and convenient means of stenciling on both porous and non-porous surfaces.

- Easy stenciling for rough and smooth surfaces.
- Convenient for remote job sites.
- No-mess, durable ink cartridge is fully disposable.
- Meets U.S. Government ink specifications.
- Available in seven high-visibility, CONEG certified and SARA compliant inks.
- Replaceable neoprene roller and plastic cover in two convenient sizes.
- Natural bristle brush.

> Oneshot Roller & Brush Assemblies

The Oneshot roller or brush twists onto a specially designed ink cartridge—creating an easy-to-use stenciling tool. The ink saturation is controlled by a valve-action pump in the assemblies. The Roller Assembly features a durable neoprene roller and the Brush Assembly uses 100% natural bristles set in epoxy to assure long-lasting performance. There's no messy refill, simply attach a new cartridge when you run out of ink.

> Oneshot Ink Cartridges

Choose from seven high-visibility colors—for porous and non-porous surfaces. All Oneshot stencil inks are CONEG certified and SARA compliant. Minimum order is eight cartridges—about one liter of ink.

»»» INK CONDITIONER

For Stencil Rollers and Pads

Extends stencil roller and ink pad life by preventing them from drying out. Adds ink mileage by maintaining the proper ink consistency.

Use with all stencil rollers and pads.

Extend your stencil rollers with Ink Conditioner

COLOR	STOCK#	MINIMUM ORDER	QTY. PRICING/PRICE EACH:		
			1 EACH	12 EACH	24 EACH
Conditioner for Stencil Inks					
Conditioner	0502-008	1 Quart (.9475 L)	\$13.00	\$12.35	\$11.70
	0504-008	1 Gallon (3.79 L)	39.00	27.05	35.10

Use chart on page 18 for conditioner.

> HOW TO USE *The Oneshot System*

> Step 1:

Insert the Oneshot roller or brush unit into the ink cartridge. This action pierces the polypropylene membrane in the cartridge, allowing ink to flow into the applicator.

> Step 2:

Shake gently. Press the ink valve button to dispense ink internally through the applicator. Begin stenciling on any porous or non-porous surface. For rough or uneven surfaces, try our Oneshot Brush.

»»» STENCIL APPLICATORS

> Rol-It-On® System For All Surfaces

Our most economical system for marking on both porous and non-porous surfaces. Use the refillable Rol-It-On ink pad to ink the roller prior to stenciling.

- For porous surfaces use a **latex** roller and **R** ink or use a **Type N** Roller with **SK-1** ink
- For non-porous surfaces order a neoprene **Type N** roller and **S** or **GS** ink.
- Use the GS Kit to meet U.S. Government specifications when stenciling on porous or non-porous surfaces.

> HV System For Porous & Non-Porous Surfaces

- For non-porous and difficult-to-mark surfaces such as plastic, vinyl, glass and metal.
- Refillable, four-ounce (118.3 ml) handle. Designed for heavier pigmented inks.
- Use with **S** and **GS** type inks.

> Rol-Flo® System For Porous Surfaces

- Provides economical and fast non-stop marking.
- Refillable, four-ounce (118.3 ml) plastic handle holds enough ink to mark up to 5,000 three-line address impressions.
- Use with **R** type ink.

See Page 18 for ink guide for these stencil applicators and their kits.

»»» STENCIL APPLICATOR KITS

Get started with our economical Stencil Applicator Kits that come with everything you need to get started.

> Rol-It-On Kit

- 3" (76.2 mm) roller assembly (latex or neoprene) with roller cover
- 3" (76.2 mm) Rol-It-On ink pad
- One quart (.9475 L) of **R** or **S** black ink

> Rol-Flo Kit

- 3" (76.2 mm) latex roller assembly with roller cover
- One quart (.9475 L) of **R** black ink

> Oneshot® Kit

- 3" (76.2 mm) roller assembly with roller cover
- Eight **GS** black ink cartridges

»»» MODEL M STENCIL BRUSH

This refillable stenciling brush is perfect for rough, porous surfaces. Bristles are set in epoxy for long-lasting performance with solvent-based inks. Easy-to-use side button releases ink. 7-1/2" (190.5 mm). Use with **Insta-Dry**, **GS-1** Black Ink and **SK-1** inks on page 17.

> Model M Replacement Brush Tips

These replacement brush tips allow you to change worn-out brush-heads without replacing the Model M body.

»» MULTI-PURPOSE INK

- Meets lowest VOC requirements and Government specifications.
- Longer lasting mark.
- Better adhesion to non-porous surfaces such as plastic and metal.
- Ideal for all non-porous and porous materials.
- Fast dry time.
- Prolongs the life of your ink roller.
- Lower HMIS Flammability Rating (2).
- Saves on freight (Not considered flammable if shipping ground).

STENCIL INK	PIGMENTED	DYE	FOR USE WITH	POROUS SURFACES	NON-POROUS SURFACES	SPECIAL PROPERTIES
Conditioner	n/a	n/a	All stencil rollers and ink pads	n/a	n/a	Prevents roller and pad dry-out. Helps maintain proper ink consistency.
R Series Ink		•	Rol-It-On® & Rol-Flo® with Latex roller	•		Dries instantly on most surfaces to a permanent matte finish; oil-, water- and fade-resistant when dry.
GS Series Ink	•		HV and Rol-It-On with Type N roller	•	•	Formulated to meet U.S. Government specs TT-I-1795A and CID A-A-208 Type IV.
S Series Ink	•		HV and Rol-It-On with Type N roller		•	Lightfast. Resistant to oil, water, and some solvents after drying. Requires agitation.
Insta-Dry Ink		•	Model M Brush and Control-Flo Marker	•	•	Dries instantly on most surfaces to a permanent matte finish; oil-, water-, and fade-resistant when dry.
SK-1 Ink	•		Model M Brush & Type N roller	•		Lightfast. Resistant to oil, water and some solvents after drying. Requires some agitation.
Stikfast® Ink		•	Control-Flo & MH6 Markers	•	•	Dries to a permanent semi-gloss finish on most surfaces; oil-, water-, and fade-resistant when dry.
Multi-Purpose Ink	•		Rol-It-On®, HV & Rol-Flo®	•	•	Meets Government specs Meets Lowest VOC Requirements Fast Dry for Porous/Non-Porous

> Silicone Lubricant

- Food Grade (Allow solvent to evaporate before incidental food contact)
 - Lubricate doors, wheels and other moving parts
 - Clean and shine metal surfaces
 - Use on molds and finishing tables to prevent sticking
 - Includes directional tube (as shown below) for hard-to-reach areas
 - Non-fluorocarbon propellant, no CFCs or ODCs
 - 13 ounces (368.55g) net weight.

Silicone application with the thin directional tube attached to narrow the spray

> Ink Cleaner

A general -purpose ink remover in a 12 oz net wt. Aerosol can. Very effective on coder wheels, rubber type, stencil rollers and brushes.

QUICK-SPRAY® AEROSOLS

> Marking Inks

These opaque aerosol inks are great for stenciling or color coding. Quik-Spray inks dry in just 30 to 60 seconds.

- All ink formulations comply with CONEG legislation.
- Environmentally safe, non-fluorocarbon propellant.
- New VOC compliant formula. Contains no CFCs
- Available in seven high-visibility colors.
- 11.5 ounces (326 g) net weight.

> Blockout Inks

Cover-up unwanted marks on cartons so they can be reused.

- Blockout ink dries quickly and is oil- and water-resistant.
- Use on porous or non-porous surfaces.
- 11.5 ounces (326 g) net weight aerosol cans (shown).
- Also available in one- or five-gallon (3.79 L or 18.93 L) pails for large-volume usage.
- New VOC compliant formula. Contains no CFCs

▶▶▶ HAND DUPLICATORS

Diagraph hand duplicators are an excellent, low-cost solution for repetitive address marking. We offer duplicators with either a disposable or a refillable ink supply. Both utilize extra strong clamps to hold the stencil in place and prevent slipping or wrinkling.

> Rocker Model Duplicators

Our Rocker Model Hand Duplicators feature a cloth-covered neoprene pad for clear marks on uneven surfaces. A built-in refillable reservoir assures excellent ink distribution throughout the pad.

> Flat-Clamp Duplicators

Flat-Clamp Duplicators feature ink-in-the-handle convenience with our unique Siphon-Flo® disposable inking system. The enclosed ink reservoir assures no-mess ink distribution. Good for remote location addressing—just carry extra Siphon-Flo ink bottles.

> Plain Stencils For Duplicators

Our Standard S stencils feature a heavy backing sheet and extra-strength blue stencil for ball point pen or typewriter preparation.

▶▶▶ DUPLICATOR INKS

> P Series Inks

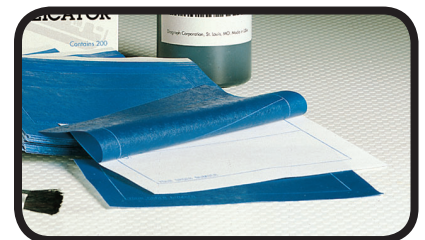

For Rocker Model Duplicators
Use these high-viscosity inks to mark on porous surfaces with our Rocker Model Hand Duplicators. Available in black with plastic spout for easy refill.

> Siphon-Flo® Inks

For Flat-Clamp Duplicators
Ink-in-the-handle bottle makes marking fast and easy and saves ink too. Insert another bottle to replenish your ink supply.

Duplicator Inks

Standard S Stencils

»» ADHESIVES & GLUES

For unglued labels and carton sealing. Stikfast and GF-5 Glues are formulated with starch-based dextrin and are optimal for porous surfaces. Willbond, GF-59 and GF-779 adhesives are formulated with a synthetic polymer resin for performance on non-porous surfaces.

> Stikfast® II Glue

For case sealing and porous surface bonding. Meets FDA and USDA requirements for food packaging.

> GF-5 Glue

Water-soluble, freeze/thaw stable and meets FDA and USDA requirements for food packaging. This glue can be conveniently left in the machine if it's covered with a damp cloth and plastic bag, which helps maintain its consistency.

> F-59 Adhesive

Ideal for affixing labels to metal containers including tinplate, terneplate, japanned steel or painted metal. Adheres to some varnished and coated surfaces. Also for use in automatic address labeling equipment when applying labels to coated paper. Meets FDA and USDA requirements for food packaging.

> Quik-Spray® Adhesive

An excellent permanent or temporary bonding aerosol adhesive for a wide variety of applications.

- Use Quik-Spray Adhesive on paper, cloth, cardboard, felt, rubber, vinyls, canvas, leather, wood and most plastics.
- Non-clog valve provides uniform spray pattern. Low soak-in; will not bleed through. Translucent when dry. 13 oz. net weight (20 oz. volume).
- New VOC-compliant formula. Contains no CFCs.

STOCK#	DESCRIPTION	PRICE
ReDuRan Special Hand Cleaner		
1901-398	3.38 fl. oz. tube (100 ml)	\$8.50

»» **ROLL CODERS** (*Indexing*)

Economical friction-driven roll coders print product information, expiration dates and date/batch codes on your carton. Each model mounts vertically or horizontally on your production line to mark the side, top or bottom of a carton.

» **SL/C Coders** (*Slim Line Roll Coders*)

Three models offer a range of print areas:

- #1 SL/C 1" x 17" (25.4 mm x 431.8 mm)
- #2 SL/C 2" x 17" (50.8 mm x 431.8 mm)
- #3 SL/C 3" x 17" (76.2 mm x 431.8 mm)

Print as low as 1-1/4" (31.75 mm) from the bottom edge of the carton. Uses DiLok, Flex Base or Hi-Speed type. Now with quick change capability - no need to purchase a separate quick change coder. Every SL/C coder has the quick change feature. Just purchase and extra die wheel for quick and easy change in type. Now with quick change capability.

» **Mini Coder**

An economical option for lighter-duty applications, the Mini Coder is ideal for coding small or lightweight items. Maximum print area 1" x 6" (25.4 mm x 152.4 mm); prints as low as 3/4" (19.05 mm) from the bottom edge of the carton. Uses DiLok type.

STOCK#	DESCRIPTION	PRINT AREA	PRICE

Mini Coder for small or lightweight items.

»»» ROLL CODER TYPE

> DiLok Type

DiLok is rubber type molded to a tongue-and-groove base which interlocks with the die wheel. Provides excellent message flexibility. Different type sizes can be mixed on the same line. For use with Diagraph RCN, SL Series, Mini, SL/NPW, and Handi-Mark coders.

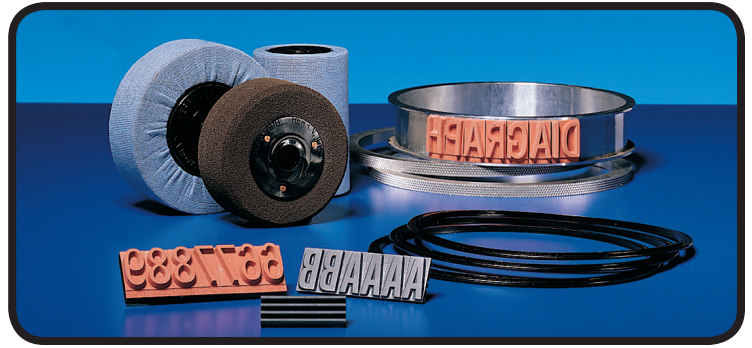

> Flex Base Type

Flex Base is molded rubber type with a flat base for easier installation and more uniform marking. Long-wearing, extra-deep characters provide sharper marking. Type holders are a necessity with this printing method. Please discuss your type requirements with your Diagraph Representative. For use with SL Series indexing roll coders.

> Hi-Speed Type

For high-speed applications. Call for details.

Choose from three different kinds of type:
DiLok, Flex Base and Hi-Speed.
See page 26 for more information

Economical, convenient, disposable. For porous surfaces. Available uninked or pre-inked. Recommended for dye type ink only.

> XLM® Cartridges

The premium cartridge—extra long-lasting and re-inkable. Most effective on porous surfaces. Available uninked or pre-inked.

> Micro-X Cartridges

Ideal for continuous web applications on porous surfaces. Not re-inkable.

> Foam Cartridges

Recommended for use with non-porous inks including pigmented. Available uninked only. Contact your Diagraph representative for appropriate foam cartridge applications.

»»» NON-POROUS WEB ROLL CODERS

> SL/NPW Coder

The low-maintenance SL/NPW Coder is ideal for web printing applications. It features a 15/16" x 17" (23.81 mm x 431.8 mm) print area and a unique ink reservoir which automatically re-inks the cartridge. For use with either dye type or pigmented type inks. Uses DiLok Type.

> SL/NPW Mini Coder

If you need to do high-volume web coding in a small print area, the low-maintenance SL/NPW Mini Coder is the solution for you. It features a 15/16" x 9" (23.81 mm x 228.6 mm) print area and an ink reservoir that automatically re-inks the cartridge. For use with dye type or pigmented type inks. Uses DiLok Type.

»»» INKS FOR SL/NPW CODERS

> XF Neoprene Ink Cartridges ☑

Disposable ink cartridges feed ink only on demand. Pre-inked; can be re-inked using ink reservoirs in matching colors.

> Ink Reservoirs ☑

Four-ounce disposable ink reservoir provides a constant ink supply to the neoprene ink cartridge.

»»» RECIPROCATING CODERS

RCN Coders, for *Intermittent-Motion Applications*, produce sharp, fast-drying marks on products and packaging film.

These coders print from one to three lines of small-character text directly on your product with a wide selection of ink types and colors. Mark on a variety of surfaces including: boxes, bags, jars, cans, labels, blister packs, and small plastic or metal parts.

We offer four types of RCN Coders: Basic, Electric, All-Air and a combination Electric/Air. These coders work well with intermittent-motion conveyors or off-line semi-automatic operations, marking up to 80 products per minute. Use neoprene DiLok type and ink cartridges with quick-drying inks. Consult your Diagraph representative for the appropriate RCN coder, accessories and ink for your application.

RCN Coders produce sharp, fast-drying marks on both porous and non-porous surfaces.

> The Basic RCN/IS

The RCN basic unit has no triggering controls and uses the four-way valve and timing device of your existing equipment. This eliminates the need for duplicate controls. Easy to install, the RCN provides four holes for stable mounting to the parent equipment. On-line operation is simple and reliable. When the unit is triggered, compressed air moves the shaft up so the type contacts and rotates the ink cartridge, and then moves the shaft and freshly inked type down to mark the product surface.

> All-Air

RCN/IAC

These all-air powered systems include a product detector switch and self-cycling air logic. For a consistent, high quality mark, a dwell adjustment knob controls the time the printhead stays in contact with the product surface. The all-air system is popular for heavy products or applications where electricity is not readily available or not desired. It is the best choice when environmental conditions, such as explosion-proof and wash-down areas, do not allow electricity.

IV 700™ Large Character Ink Jet Printer

Economical ink jet printer for one-line coding applications The IV/700 is the market's best value among low-cost large character ink jet printers. Designed to surpass competitive systems in print quality, print speed, message control and printhead flexibility, it offers reliable printing of single-line codes at a very affordable price.

Features & Benefits

- Prints single-line alphanumeric messages
- Print Speed ranges from 5 fpm to 250 fpm
- Choice of 5-dot, 7-dot and 7-dot bold fonts
- Choice of six high-visibility ink colors
- Stores up to 99 fifty-character messages
- QWERTY Keypad with many convenience features
- Adjustable Printhead for side, top and bottom printing
- Large Ink Canister can be replaced during production
- Features: 12 function keys for editing; built-in count, shift, time and date codes; "ink out" alarm; two-line, 40-character liquid crystal display; modular printhead

ITW INKS Formulated for Marsh® Inkjet Printers

The QUALITY You Need

Consistent performance of your ink jet printers is vital to your production line operation, so you need quality inks that deliver sharp barcodes and text messages time after time, year after year. That is exactly what you get with ITW Inks.

The VALUE You Want

Ink quality is vital, but it's not the only factor that is critical to your success. Controlling costs is just as important as optimizing quality, and that's where ITW Inks give you something extra — a competitive edge in a competitive world.

- Variety of inks for Marsh models/printheads
- Inks for valve systems and Unicorn® printers
- Inks for porous and non-porous surfaces
- High-resolution inks for special applications
- Sub-micron filtration assures quality control
- Fully inspected to ensure consistent quality
- Available in bottles, pails or cartridges
- ITW is a world leader in inkjet technology & products
- Low price/high value is an ITW core philosophy
- Competitive lead times and deliveries

Consistent performance of ink jet printers is vital to your production line. That is exactly what you get with ITW Inks.
